

Hydrogen boiler (WILLHEAT)

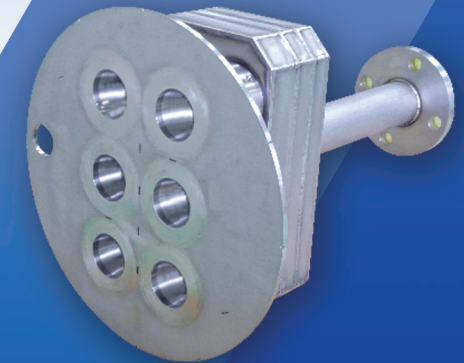

Industry-leading boiler efficiency in hydrogen boilers (zero CO₂ emissions)

The hydrogen boiler applies a low NOx premixing burner with Kawasaki's unique technology. The boiler has 98% boiler efficiency.

Ecological Frontiers
S class**

Low NOx premixing burner

Product Description

The boiler can be used in various fields such as chemical products, steel, food processing, and air conditioning.

Features

- Utilizing by-product hydrogen from caustic soda and in a future hydrogen society
- Having a lineup of four capacity with equivalent evaporation of 750 to 2000kg/h
- Achieving NOx emissions of 50ppm
